

Energy Leader Partnerships

OVERVIEW

LOCAL GOVERNMENTS JOINING WITH SOUTHERN CALIFORNIA EDISON TO ADVANCE SUSTAINABILITY

ENERGY LEADER PARTNERSHIPS

Local Governments Leading by Example

Southern California Edison (SCE) is joining together with cities and counties to help achieve a joint vision of sustainability.

Through the Energy Leader Partnerships Program, SCE provides support to local governments to identify and address energy efficiency opportunities in municipal facilities, take actions supporting the California Long-Term Energy Efficiency Strategic Plan and increase community awareness of demand side management (DSM) opportunities.

HOW IT WORKS

1. Forming the Partnership

SCE and one or more local governments enter into a formal agreement to work together to identify and meet the goals of energy savings, demand reduction and environmental sustainability. A Partnership team is formed consisting of representatives from the local jurisdiction and SCE to implement the Partnership's objectives. In certain partnerships, multiple local governments may choose to participate jointly through a third party implementer who partners with SCE.

2. Municipal Retrofits

SCE will work with local governments to help audit municipal facilities and identify promising retrofit opportunities. Local governments will be eligible for enhanced Partnership incentives — above core SCE incentives — designed to address financial constraints in the public sector. With the Energy Leader model, these incentive levels are reached and then increased as local jurisdictions reach milestones in energy savings.

3. Strategic Plan Actions

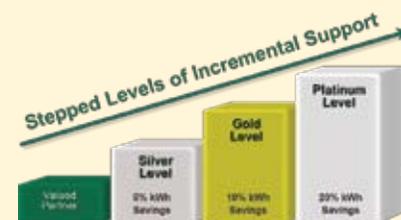

SCE will support local governments in meeting long term sustainability goals in climate action planning, code compliance, reach codes and other strategic plan initiatives.

4. Marketing and Outreach to the Community

SCE will help Partners learn about and leverage the full range of demand side management programs and services, including energy efficiency rebates for residential and business customers, demand response programs, solar training and rebates. The Partnership will co-brand messaging with the local government and use local communication channels.

Energy Leader Partnership Program Model

The ELP program has 4 tier levels – Valued Partner, Silver, Gold and Platinum. All Partner levels receive SCE support consisting of Marketing, Education, Outreach & Training, Technical Assistance and Direct Implementation. Achieving pre-determined threshold energy savings goals in city facilities and community-wide will trigger advancement to the higher incentive tiers.

To reward and motivate Partners toward more energy efficiency, the Program offers increased incentives as Partners move progressively up the tiers

HOW WILL SCE HELP?

SCE will bring a team of resources to ensure Partnership success. Once you become a Partner, the SCE team will meet with you monthly to provide guidance and support towards implementation of Partnership goals.

Project Manager

Your assigned SCE Partnership project manager will oversee the Partnership and coordinate the programs and budget to help you succeed.

Account Manager

In addition to the other customer support services SCE provides, your dedicated SCE account manager will help you identify retrofit opportunities and identify all financial incentives available to you.

Region Manager

Your SCE region manager will support you with communications to senior local government management to help communicate Partnership plans and successes.

PARTNER'S ROLE

As a Partner, your role is simply to be committed to working together with SCE to achieve the goals of the Partnership. Each Partnership will address the goals in municipal retrofits, strategic plan actions and DSM marketing and outreach. For the Partnership to be successful, the entire team must have a long term commitment to achieving these goals. As a Partner, you will select an energy champion to serve as an active member on the Partnership team and to act as an advocate for the Partnership within your jurisdiction.

WHY WOULD I WANT TO JOIN

There are numerous benefits to being an Energy Leader Partner.

- Reduce government operational costs and thereby reduce utility bills
- Demonstrate a leadership role in the community
- Help achieve local government greenhouse gas reduction goals
- Fully leverage SCE programs and services in your own facilities as well as in your residential and business community

EASY TO PARTICIPATE

For more information on how to become an Energy Leader Partner, contact your Region Manager or send an email to:

EnergyEfficiencyPartnerships@sce.com

Southern California Edison energy efficiency partnerships and programs are funded by California utility customers and administered by Southern California Edison or third party contractors under the auspices of the California Public Utilities Commission. Program terms and conditions apply.
